

## TH3/TH 19 Modal Integration Study

---

Your attendance is requested at the first open house for the TH 19 / TH 3 Modal Integration Study. This open house will define the scope of the project and gather information on motorized and non-motorized issues and concerns in the area. The purpose of this study is to identify and evaluate potential grade-separation concepts that would promote and enhance non-motorized transportation and build a more cohesive community. In addition, this study will need to identify concepts and identify an implementation and funding strategy to achieve this vision. This multifaceted study will need to recognize and address the following challenges and opportunities:

- Transit Hub/Trail Head Plans
- Intersection of TH 3/TH 19
- Downtown/Water Street Pedestrian Demand
- Union Pacific and Progressive Rail Crossings
- Malt-O-Meal Plant and Pedestrian Crossing
