

**SPRING CREEK BRIDGE  
REPLACEMENT**

# **Project Update**

*May 01, 2020*

## **Project Update 5/01/2020**

Construction crews were back on-site this week to begin the final stages of the Spring Creek Bridge Replacement Project. Remaining work mostly consists of final grading, seeding, landscaping, and paving. Crews expect to complete the majority of this work, with the exception of the paving by the end of next week. Paving is schedule for mid to late May. A detour has been posted to allow the remaining work to be completed in a safe manner.

Please visit the Spring Creek Bridge Replacement Project Website for additional information:
